

# aSURE<sup>TM</sup> Fittings

## The New Concept in Functional Design!

The aSURE<sup>TM</sup> utilizes a unique approach that incorporates an elastomeric TPE (Cellgyn<sup>TM</sup>) gasket fused into a singular sanitary fitting, forming a one-piece composite design. The result is a gendered fitting that can be used in conjunction with any standard sanitary connection. It provides superior ergonomics and less risk of contamination.

aSURE<sup>TM</sup> fittings have been developed for single-use connectivity applications where the most stringent practices are required. They are manufactured from medical-grade materials and are animal derived component free (ADCF).

### Features

One Piece Design

Medical Grade Materials/ ADCF

No Solvents or Cements

Gamma Stable 25 kGy to 40 kGy / Autoclavable

Gendered Connection

Single Use Technology

### Benefits

Ensures Proper Alignment

Lowers Risk of Contamination

Gendered Connection Aids in Proper Work Instruction

Superior Ergonomics

Eliminates Lost or Misused Gaskets

Excellent Compatibility with Most Acids and Bases

1-1/2" Tri-Clamp x 3/8" Mono Barb Adapter

1-1/2" Tri-Clamp x 1/2" Mono Barb Adapter

1-1/2" Tri-Clamp x 3/4" Mono Barb Adapter

1-1/2" Tri-Clamp x 1" Mono Barb Adapter

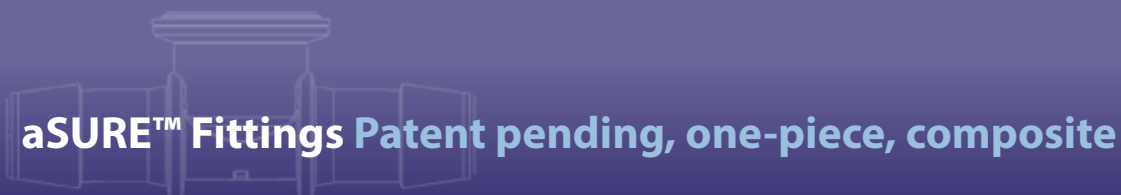

### Biocompatibility:

All materials in contact with fluid path meet USP Class VI <88> requirements, FDA Title 21 CFR 177.1520, are Animal Derived Component Free (ADCF), and REACH Compliant

### Manufacturing:

Manufactured and Packaged in an ISO Class 7 (Class 10,000) Environment

\*Add "-cp" to each part number for gamma-irradiated parts
